Angular4OidcclientjsExample

This project was generated with [Angular CLI](#) version 1.2.6.

Development server

Run `ng serve` for a dev server. Navigate to `http://localhost:4200/`. The app will automatically reload if you change any of the source files.

Code scaffolding

Run `ng generate component component-name` to generate a new component. You can also use `ng generate directive|pipe|service|class|module`.

Build

Run `ng build` to build the project. The build artifacts will be stored in the `dist/` directory. Use the `-prod` flag for a production build.

Running unit tests

Run `ng test` to execute the unit tests via [Karma](#).

Running end-to-end tests

Run `ng e2e` to execute the end-to-end tests via [Protractor](#). Before running the tests make sure you are serving the app via `ng serve`.

Further help

To get more help on the Angular CLI use `ng help` or go check out the [Angular CLI README](#).
